For each style you want to create, follow these steps: Add a <style> element with a name that uniquely identifies the style. Add an <item> element for each style attribute you want to define. The name in each item specifies an attribute you...

Styles and Themes | Android Developers

The guide codifies and records style decisions made by those in our Developer Relations group so that you can write documentation consistent with our other documentation.

Google developer documentation style guide | Google Developers

This document serves as the complete definition of Google's Android coding standards for source code in the Kotlin Programming Language. A Kotlin source file is described as being in Google Android Style if and only if it adheres to the rules herein. Like other programming style guides, the issues covered span not only aesthetic issues of formatting, but other types of conventions or coding standards as well.
