Benefits Realization Management is one of the many ways of managing how time and resources are invested into making desirable changes.

Benefits Realization Management has four main definitions. The first definition is to consider benefits management as an organisational change process. It is defined as "the process of organizing and managing, such that the potential benefits arising from the use of IT are actually realized". The second definition perceives it as a process. Benefits management is

Benefits realisation management - Wikipedia

Effective realisation planning enables organisations to maximise the potential results from the change or investment. It must also identify and manage the changes that will be required to maximise the planned benefits. These changes themselves may well need to be managed carefully as part of a change management programme.

Benefits Realisation: A Comprehensive Overview
