Biochemistry describes how these

Get Free Biochemistry And Cell Biology Booksite

Biochemistry molecules are made and the interactions between them at molecular level. Cell biology then goes on to describe how the biochemicals are organised into cells and cellular components, which then form the tissues of the body. Normal processes within the body are called physiological, whereas processes that

Elbowia suggests, cell biology refers to the branch of science that deals with the study of the structures and functions of the cell, revolving around the idea that it is the basic unit of life.. By studying what the cell is and how it works, comprehensive knowledge about life as a whole can be obtained.
