Instilling the habit of reading newspaper in kids at an early age is a good idea. However, kids' newspaper should be colorful and fun. This newspaper template for kids is all that and much more. Loaded with vibrant colors and an easy to read font, use this to attract children to news. [11+ Kids Newspaper Templates]

Retells the tale of the little boy whose resourcefulness and courage saved his country from being destroyed by the ocean.

Nine-year-old cousins Rosie, Lily, and Tess make a neighborhood newspaper celebrating all their friends on Cobble Street.

In this unit you can play games that Russian children have been playing for centuries, make a cosmonaut craft of the Baikonur Cosmodrome in Kazakhstan, craft a lapbook of the history of science, and try your hand at some real watercolor painting projects. There are dozens of projects to choose from in Unit 3-10. In each unit you'll find a recommended library list, important background information about each topic, lots of activities to choose from for kids of all ages, and sidebars with a bunch more ideas including Additional Layers, Fabulous Facts, On The Web, Writer's Workshop, Famous Folks, and Teaching Tips. Printable maps and worksheets are included at the end of each unit and may be printed as often as needed for your family or class.

How many excuses are there for not doing homework? Let us count the ways: Giant lizards invaded the neighborhood. Elves hid all the pencils. And then there was that problem with carnivorous plants.... The excuses go on and on, each more absurd than the next and escalating to hilarious heights. Featuring detail-rich illustrations by Benjamin Chaud, this book is guaranteed to amuse kids and their parents, not to mention anyone who has experienced a slacker student moment—and isn't that everyone? Plus, this is the fixed format version, which will look almost identical to the print version. Additionally for devices that support audio, this ebook includes a read-along setting.

Preparing students to be active, informed, literate citizens is one of the primary functions of public schools. But how can students become engaged citizens if they can't read, let alone understand, their social studies texts? What can educators—and social studies teachers in particular—do to help students develop the knowledge, skills, and motivation to become engaged in civic life? Building Literacy in Social Studies addresses this question by presenting both the underlying concepts and the research-based techniques that teachers can use to engage students and build the skills they need to become successful readers, critical thinkers, and active citizens. The authors provide targeted strategies—including teaching models, graphic organizers, and step-by-step instructions—for activities such as * Building vocabulary, * Developing textbook literacy skills, * Interpreting primary and secondary sources, * Applying critical thinking skills to newspapers and magazines, and * Evaluating internet sources. Readers will also learn how to organize classrooms into models of democracy by creating learning communities that support literacy instruction, distribute authority, encourage cooperation, and increase accountability among students. Realistic scenarios depict a typical social studies teacher's experience before and after implementing the strategies in the classroom, showing their potential to make a significant difference in how students respond to instruction. By making literacy strategies a vital part of content-area instruction, teachers not only help students better understand their schoolwork but also open students' eyes to the power that informed and engaged people have to change the world.

Textbooks are symbols of centuries-old education. They're often outdated as soon as they hit students' desks. Acting "by the textbook" implies compliance and a lack of creativity. It's time to ditch those textbooks—and those textbook assumptions about learning in Ditch That Textbook, teacher and blogger Matt Miller encourages educators to throw out meaningless, pedestrian teaching and learning practices. He empowers them to evolve and improve on old, standard, teaching methods. Ditch That Textbook is a support system, toolbox, and manifesto to help educators free their teaching and revolutionize their classrooms.

Shows parents that teaching and learning can happen when they do simple things together that make the most of their child's natural curiosity and show that learning is fun and important. This will encourage the child to study, learn, and stay in school.

Six Timeline Panels, Marker, and Study Guide Develop your own unique art timelines with this set of special Create-A-Timeline panels with mark and erase surface.Students can research art history, art styles, ancient art, multicultural art, as well as artists and their work, and apply color reproductions, black and white copies, or draw examples that illustrate the time frame being studied. Includes a dry erase marker for marking dates and events which easily wipes off with a dry cloth. Water soluble markers can also be used.Six 27 x 13-inch panels on heavy card stock can be joined to create a timeline over 13 feet long or used individually. Teacher's Guide includes ideas and examples of how to use the timeline panels and has an 8 1/2 x 11-inch reproducible student timeline.

Humans, especially children, are naturally curious. Yet, people often balk at the thought of learning science—the "eyes glazed over" syndrome. Teachers may find teaching science a major challenge in an era when science ranges from the hardly imaginable quark to the distant, blazing quasar. Inquiry and the National Science Education Standards is the book that educators have been waiting for—a practical guide to teaching inquiry and teaching through inquiry, as recommended by the National Science Education Standards. This will be an important resource for educators who must help school boards, parents, and teachers understand "why we can't teach the way we used to." "Inquiry" refers to the diverse ways in which scientists study the natural world and in which students grasp science knowledge and the methods by which that knowledge is produced. This book explains and illustrates how inquiry helps students learn science content, master how to do science, and understand the nature of science. This book explores the dimensions of teaching and learning science as inquiry for K-12 students across a range of science topics. Detailed examples help clarify when teachers should use the inquiry-based approach and how much structure, guidance, and coaching they should provide. The book dispels myths that may have discouraged educators from the inquiry-based approach and illuminates the subtle interplay between concepts, processes, and science as it is experienced in the classroom. Inquiry and the National Science Education Standards shows how to bring the standards to life, with features such as classroom vignettes exploring different kinds of inquiries for elementary, middle, and high school and Frequently Asked Questions for teachers, responding to common concerns such as obtaining teaching supplies. Turning to assessment, the committee discusses why assessment is important, looks at existing schemes and formats, and addresses how to involve students in assessing their own learning achievements. In addition, this book discusses administrative assistance, communication with parents, appropriate teacher evaluation, and other avenues to promoting and supporting this new teaching paradigm.

NEW STUDENT GETS OLD TEACHER The bad news is that Cara Landry is the new kid at Denton Elementary School. The worse news is that her teacher, Mr. Larson, would rather read the paper and drink coffee than teach his students anything. So Cara decides to give Mr. Larson something else to read—her own newspaper, The Landry News. Before she knows it, the whole fifth-grade class is in on the project. But then the principal finds a copy of The Landry News, with unexpected results. Tomorrow's headline: Will Cara's newspaper cost Mr. Larson his job?
