The BMW M52 is a straight-6 DOHC petrol engine which was produced from 1994–2000. It was released in the E36 320i, to replace the M50. The BMW S52 engine is a high performance variant of the M52 which powered the American and Canadian market E36 M3 from 1996–1999.. In 1998, the "technical update" (M52TU) upgrades included adding variable valve timing to the exhaust camshaft.

Tips for dropping an M52/S52 in: 1. It's easiest to drop the engine and trans in together, opposed to dropping the engine in and then bolting the trans up. 2. Drop the engine in without the intake manifold on, you can put this on later. 3. Get yourself a load leveler, to angle the trans down and the engine up and then to level it in the car
