Willis's Elements of Quantity Surveying has become a standard text in the teaching of building measurement - a core part of the degree curriculum for quantity surveyors. The book will be fully updated to follow the guidance given by RICS NRM 1 & 2. As in previous editions the focus remains a logical approach the detailed measurement of building elements and copious use of examples to guide the student. The text has been fully revised in line with the NRM guidance and includes many new and revised examples illustrating the use of NRM. The hallmarks of previous editions - clarity and practicality - are maintained, while ensuring the book is fully up to date, providing the student of quantity surveying with a first class introduction to the measurement of building elements.

This investigation of the fundamental character of organizational identity and identification with an organization is arranged in the form of a provocative discussion between key scholars. The book focuses on three different paradigmatic views of identity: functionalist, interpretive and postmodern. Similarities and distinctions among these ways of understanding are explored, and numerous theoretical and practical insights are gained. The book concludes with a discussion of the relevance of identity as a construct in organizational study, and observations on conversation and theory building.
