Elementary Probability

- When an ordinary dice is thrown, each of the faces numbered 1, 2 . . . 6 has an equal chance of falling uppermost.

There is one chance in six of throwing a 3 so we write the probability statement: $\Pr(3)$ or simply $P(3) = 1/6$ i.e. $\Pr(\text{not throwing a } 3) = 5/6$ i.e. Total probability = $\Pr(3) + \Pr(\text{no } 3) = 1/6 + 5/6 = 1$ Probability
