PPT - Chapter 23:Mirrors and Lenses PowerPoint ...

Mirrors and Lenses. 38-1 Spherical Mirrors. A spherical mirror consists of a small section of the surface of a sphere with one side of the surface covered with a polished reflecting material, usually silver or aluminum. If the outside, or convex surface, is silvered, we have a convex mirror; if the inside, or concave surface, is silvered, we have a concave mirror.

Sound and Light Chapter 4 Light and Our World Flashcards ...

Difference Between Mirror and Lens. The core differences between the mirror and lens would be due to its construction and working. The mirror is the apparatus which reflects the light falling on them. Whereas, lenses are the ones that manipulate the light. The mirror is having one side reflective coating and on the other hand.
