purpose of screens in coal preparation

Coal processing has changed significantly in recent decades. Especially in large coal mines, boiler coal is increasingly extracted by open-pit mining and by so-called surface mining and no longer so much by underground mining. If possible, coal found at depths of up to 90 m is today mined by the open pit method.

Advances in screening technology in the mining sector ...

Factors precipitating the

Read Book Coal Preparation Plant

Advances in the mining industry include: increased liabilities and costs of environmental concerns; safety issues and government regulations; less available coal and more difficult deposits; the advent of automated systems, including measurement and controls systems; introduction of more productive and economical robotic equipment; and the increasing size, capacity and sophistication of new and bigger coal mining and related excavation and haulage equipment .
