Maya writing is composed of logographic and moraic components, and is supported by phonetic complements. Each glyph could represent a complete word or a syllable. The script consists of a complete syllabary, meaning that it comprises glyphs that each represent a consonant/vowel sequence (which is more precisely known as a mora).

Mayanist and scholar Michael D. Coe's Breaking the Maya Code (Thames and Hudson, 2012) is a fascinating account of the decipherment of Maya hieroglyphics. Coe describes how, in 1952, reclusive Russian scholar Yuri Valentimovich Knorosov made a crucial breakthrough by showing that Maya writing did in fact convey spoken words.
