While this manual is written for the design of screw anchor soil nail systems, both types are described below. 1.2.3 Screw Anchor Soil Nails - Screw anchor soil nails are screw anchors which consist of 1.5 inch square solid steel shafts, on which steel bearing plates or helices are welded at regular intervals (Figure 1.2.4). The steel used is a high-strength alloy that is specifically ...

The proposed pile layout is shown on the foundation plan along with a design working load of 30 kips per pile with a Factor of Safety (FOS) = 2. Preliminary product selection suggests that the Model HP288 helical pile is the best fit for this load condition with an ultimate torque-rated capacity of 71.1 kips.

Supportworks Design Examples - Helical Piles

- A helical anchor/pile consists of one or more helix-shaped bearing plates attached to a central shaft, which is installed by rotating or "torqueing" into the ground. Each helix is attached near the tip, is generally circular in plan, and formed into a helix with a defined

pitch.

Helical pile design is governed by simple geotechnical engineering principles. Helical pile foundation design is controlled primarily by the bearing resistance on each helical plate. In some cases, the shaft resistance can also be included. Since the helical pile is in compression the pile might have to be examined in buckling.

CHANCE®HELICAL ANCHOR/PILE BEARING CAPACITY The capacity of a helical anchor/pile is dependent on the strength of the soil, the projected area of the helix plate(s), and the depth of the helix plate(s) below grade. The soil strength can be evaluated by use of various techniques and theories (Clemence, 1985).

Helical Tieback Anchors. Helical tiebacks are a pre-engineered system for earth retention applications. The success of the helical anchor tieback system is based on decades of similar use of anchors by electric utilities. The proven reliability and engineered predictability of these tiebacks produce an earth-retention system that is efficient, economical and hassle-free.
