The package include the following: 4+ Hours of Video Lectures (Focused on New Format) 15 TOPIK Guide Self-Study E-Books Grammar & Vocabulary study material for all levels Comprehensive Guide for TOPIK Essay Writing 15 Korean Language textbooks/reference eBooks TOPIK Papers (Past+New pattern) + Audio Files Individual Evaluation for TOPIK Essay Writing Section Updated Editions of the Study package for FREE

"Education is a powerful force that can speed up economic growth, improve income distribution, facilitate social mobility, and reduce poverty. It can also improve the quality of life for citizens by contributing to longer life expectancy, lower fertility and infant mortality rates, and a more cohesive national identity. However, none of these positive outcomes are automatic. All too often, investment in education generates low returns to the individuals involved and society at large. Thus, while investment in education is a necessary condition for faster development and prosperity, it is by no means sufficient. This MENA flagship report explores whether past investments in education in the region have generated their maximum economic returns, and, if not, why they have failed to do so. Ultimately, the answers to these questions are being sought to help policymakers chart more fruitful strategies in the future." -- Overview (p. 1).

The movement of people in Southeast Asia is an issue of increasing importance. Countries of the Association of Southeast Asian Nations (ASEAN) are now the origin of 8 percent of the world's migrants. These countries host only 4 percent of the world's migrants but intra-regional migration has turned Malaysia, Singapore, and Thailand into regional migration hubs that are home to 6.5 million ASEAN migrants. However, significant international and domestic labor mobility costs limit the ability of workers to change firms, sectors, and geographies in ASEAN. This report takes an innovative approach to estimate the costs for workers to migrate internationally. Singapore and Malaysia have the lowest international labor mobility costs in ASEAN while workers migrating to Myanmar and Vietnam have the highest costs. Singapore and Malaysia's more developed migration systems are a key reason for their lower labor mobility costs. How easily workers can move to take advantage of new opportunities is important in determining how they fare under the increased economic integration planned for ASEAN. To study this question, the report simulates how worker welfare is affected by enhanced trade integration under different scenarios of labor mobility costs. Region-wide, worker welfare would be 14 percent higher if barriers to mobility were reduced for skilled workers, and an additional 29 percent if barriers to mobility were lowered for all workers. Weaknesses in migration systems increase international labor mobility costs, but policy reforms can help. Destination countries should work toward systems that are responsive to economic needs and consistent with domestic policies. Sending countries should balance protections for migrant workers with the needs of economic development.

This work examines the role played by the state and private sectors in organizing labour migration, and the economic and social issues raised by such migration policies and programmes. It explores the question of whether, and how, migrant workers should be controlled and regulated to safeguard the interests of the sending state without infringing the basic rights of the individual.

This volume examines key aspects of the migration process that are particularly relevant in the Asian context. It looks into established concepts and theoretical propositions that have found application in other areas, particularly in the West and explores their validity and relevance in understanding the realities of migration in Asia. Global and Asian Perspectives on International Migration features the perspectives of scholars from Asia and other parts of the world, as well as diverse backgrounds. It presents a variety of forms, directions, policies and institutions, including circular and temporary migration; the management of cultural diversity; the gender perspective on migration in North America, Europe and Asia; returning migrants; migration governance in the ASEAN economic community; and the determinants of migration. In conclusion, the book explores migration transition in Asia and revisits select theories in light of recent evidence. With its dialogic approach to migration in Asia by renowned authors from various regions and disciplines, this book will serve as a valuable resource to policy makers in research and academia, civil society, international organizations and the private sector.

In a dramatic unveiling of the little-known world of contracted military logistics, Adam Moore examines the lives of the global army of laborers who support US overseas wars. Empire's Labor brings us the experience of the hundreds of thousands of men and women who perform jobs such as truck drivers and administrative assistants at bases located in warzones in the Middle East and Africa. He highlights the changes the US military has undergone since the Vietnam War, when the ratio of contractors to uniformed personnel was roughly 1:6. In Afghanistan it has been as high as 4:1. This growth in logistics contracting represents a fundamental change in how the US fights wars, with the military now dependent on a huge pool of contractors recruited from around the world. It also, Moore demonstrates, has social, economic, and political implications that extend well beyond the battlefields. Focusing on workers from the Philippines and Bosnia, two major sources of "third country national" (TCN) military labor, Moore explains the rise of large-scale logistics outsourcing since the end of the Cold War; describes the networks, infrastructures, and practices that span the spaces through which people, information, and goods circulate; and reveals the experiences of foreign workers, from the hidden dynamics of labor activism on bases, to the economic and social impacts these jobs have on their families and the communities they hail from. Through his extensive fieldwork and interviews, Moore gives voice to the agency and aspirations of the many thousands of foreigners who labor for the US military. Thanks to generous funding from UCLA and its participation in TOME (Toward an Open Monograph Ecosystem), the ebook editions of this book are available as Open Access volumes from Cornell Open (cornellopen.org) and other repositories.

A unique, revealing look at the history and contemporary culture of the Philippine Islands and their multicultural and foreign-influenced facets. * An etiquette section that discusses respect and levels of interaction, first names and surnames, titles of respect, and core values versus surface values * Twelve photographs of noteworthy figures such as physician and novelist Jose Rizal, nationalist Andres Bonifacio, and other Filipino heroes

Rachel Carson Environment Book Award, First Place (2018) IPY Outstanding Book of the Year: Most Likely to Save the Planet (2018) Thorpe Menn Literary Excellence Award (2018) "Reads like a mystery novel as Gillam skillfully uncovers Monsanto's secretive strategies." –Erin Brockovich "A damning picture...Gillam expertly covers a contentious front." –Publishers Weekly "A must-read." –Booklist "Hard-hitting, eye-opening narrative." –Kirkus It's the pesticide on our dinner plates, a chemical so pervasive it's in the air we breathe, our water, our soil, and even found increasingly in our own bodies. Known as Monsanto's Roundup by consumers, and as glyphosate by scientists, the world's most popular weed killer is used everywhere from backyard gardens to golf courses to millions of acres of farmland. For decades it's been touted as safe enough to drink, but a growing body of evidence indicates just the opposite, with research tying the chemical to cancers and a host of other health threats. In Whitewash, veteran journalist Carey Gillam uncovers one of the most controversial stories in the history of food and agriculture, exposing new evidence of corporate influence. Gillam introduces readers to farm families devastated by cancers which they believe are caused by the chemical, and to scientists whose reputations have been smeared for publishing research that contradicted business interests. Readers learn about the arm twisting of regulators who signed off on the chemical, echoing company assurances of safety even as they permitted higher residues of the pesticide in food and skipped compliance tests. And, in startling detail, Gillam reveals secret industry communications that pull back the curtain on corporate efforts to manipulate public perception. Whitewash is more than an exposé about the hazards of one chemical or even the influence of one company. It's a story of power, politics, and the deadly consequences of putting corporate interests ahead of public safety.
