Florence Foster Jenkins was the most famous, though untalented, soprano in twentieth century America. Her extraordinary story is now a film directed by Stephen Frears starring Meryl Streep as the indomitable Florence Foster Jenkins and Hugh Grant as her husband/manager, St. Clair Bayfield. In this full-length biography tie-in to the film, Nicholas Martin, the scriptwriter, and Jasper Rees take a deeper look at her life and times. Born in Wilkes-Barre, Pennsylvania in 1868, Florence adored music, but her wealthy father refused to allow

her to study in Europe. In 1909, she inherited a considerable sum of money when her father died. It was then that she began to take singing lessons, vowed to become a great soprano and met St Clair Bayfield. At seventy six, after a lifetime supporting classical music societies and giving self-financed recitals, she gave a solo concert at Carnegie Hall that drew Cole Porter, Gypsy Rose Lee and other luminaries to the sold-out hall. It was a night to remember. Florence felt she had triumphed, but the crowd roared with laughter. After a lifetime of singing to entertain others, she didn't know the one thing that everyone else did and that St. Clair Bayfield kept from her: she had a terrible voice and couldn't sing a note. Florence Foster Jenkins is the book everyone will be reading after Meryl Streep brings this unintentionally funny and ultimately heartbreaking American woman to life.

The Renaissance in Florence conjures images of beautiful frescoes and elegant buildings—the dazzling handiwork of the city ’ s skilled artists and architects. But equally important for the centuries to follow were geniuses of a different sort: Florence ’ s manuscript hunters, scribes, scholars, and booksellers, who blew the dust off a thousand years of history and, through the discovery and diffusion of ancient knowledge, imagined a new and enlightened world. At the heart of this activity, which bestselling author Ross King relates in his exhilarating new book, was a remarkable man: Vespasiano da Bisticci. Born in 1422, he became what a friend called “ the king of the world ’ s booksellers. ” At a time when all books were made by hand, over four decades Vespasiano produced and sold many hundreds of volumes from his

bookshop, which also became a gathering spot for debate and discussion. Besides repositories of ancient wisdom by the likes of Plato, Aristotle, and Quintilian, his books were works of art in their own right, copied by talented scribes and illuminated by the finest miniaturists. His clients included a roll-call of popes, kings, and princes across Europe who wished to burnish their reputations by founding magnificent libraries. Vespasiano reached the summit of his powers as Europe's most prolific merchant of knowledge when a new invention appeared: the printed book. By 1480, the king of the world's booksellers was swept away by this epic technological disruption, whereby cheaply produced books reached readers who never could have afforded one of Vespasiano's elegant manuscripts. A thrilling chronicle of intellectual ferment set against the dramatic political and religious turmoil of the era, Ross King's brilliant *The*

Praise for Small's earlier work on Nightingale: 'Hugh Small, in a masterly piece of historical detective work, convincingly demonstrates what all previous historians and biographers have missed . . . This is a compelling psychological portrait of a very eminent (and complex) Victorian.' James Le Fanu, Daily Telegraph Florence Nightingale (1820-1910) is best known as a reformer of hospital nursing during and after the Crimean War, but many feel that her nursing reputation has been overstated. A Brief History of Florence Nightingale tells the story of the sanitary disaster in her wartime hospital and why the government covered it up against her wishes. After the war she worked to put the lessons of the tragedy to good use to reduce the very high

mortality from epidemic disease in the civilian population at home. She did this by persuading Parliament in 1872 to pass laws which required landlords to improve sanitation in working-class homes, and to give local authorities rather than central government the power to enforce the laws. Life expectancy increased dramatically as a result, and it was this peacetime civilian public health reform rather than her wartime hospital nursing record that established Nightingale's reputation in her lifetime. After her death the wartime image became popular again as a means of recruiting hospital nurses and her other achievements were almost forgotten. Today, with nursing's new emphasis on 'primary' care and prevention outside hospitals, Nightingale's focus on public health achievements makes her an increasingly relevant figure.

The Heart of a Woman offers the first-ever biography of Florence B. Price, a composer whose career spanned both the Harlem and Chicago Renaissances, and the first African American woman to gain national recognition for her works. Price's twenty-five years in Chicago formed the core of a working life that saw her create three hundred works in diverse genres, including symphonies and orchestral suites, art songs, vocal and choral music, and arrangements of spirituals. Through interviews and a wealth of material from public and private archives, Rae Linda Brown illuminates Price's major works while exploring the considerable depth of her achievement. Brown also traces the life of the extremely private individual from her childhood in Little Rock through her time at the New England Conservatory, her extensive teaching, and her struggles with racism, poverty, and professional jealousies. In addition, Brown provides musicians and scholars with
