About the editors: Original edition edited by Raymond Allchin and Norman Hammond Revised and updated edition edited by Warwick Ball with Norman Hammond Afghanistan is at the cultural crossroads of Asia, where the great civilisations of Mesopotamia and Iran, South Asia and Central Asia overlapped and sometimes conflicted. Its landscape embraces environments from the high mountains of the Hindu Kush to the Oxus basin and the great deserts of Sistan; trade routes from China to the Mediterranean, and from Central Asia to the Arabian Sea cross the country. It has seen the development of early agriculture, the spread of Bronze Age civilisation of Central Asia, the conquests of the Persians and of Alexander of Macedon, the spread of Buddhism and then Islam, and the empires of the Kushans, Ghaznavids, Ghurids and Timurids centred there, with ramifications across southern Asia. All of which has resulted in some of the most important, diverse and spectacular historical remains in Asia. First published in 1978, this was the first book in English to provide a complete survey of the immensely rich archaeological remains of Afghanistan. The contributors, all acknowledged scholars in their field, have worked in the country, on projects ranging from prehistoric surveys to the study of Islamic architecture. It has now been thoroughly revised and brought up to date to incorporate the latest discoveries and research.

"Shelldrake" is an informative and detailed synopsis of the carefully preserved and restored guns and artillery on display in Canada. The Royal Regiment of Canadian Artillery is represented by a long and distinguished line of gunners with historical ties back to the days before Canada's Confederation. The honour of defending Canada while standing ready to support operations overseas in peace and war continues to this day. In doing so, it is necessary to remember that the weapons of war are an integral part of what keeps this nation safe, although the examples that have been used to make it so are few and far between. The descriptions of Canadian artillery and the places of honour where they can be viewed highlights the importance of the equipment that brought our nation forward at key turning points in history when our guns were in use as tools of war at home and overseas. This guide book will show the interested reader where to find examples of the historical guns preserved in Canada, and perhaps serve as a window on how Canada's military contribution to security in the world has evolved.

First published in 1996. Routledge is an imprint of Taylor & Francis, an informa company.

This report provides witness accounts of the devastating effects that white phosphorus munitions had on civilians and civilian property in Gaza. Human Rights Watch researchers in Gaza immediately after hostilities ended found spent shells, canister liners, and dozens of burnt felt wedges containing white phosphorus on city streets, apartment roofs, residential courtyards, and at a United Nations school. The report also presents ballistics evidence, photographs, and satellite imagery, as well as documents from the Israeli military and government.

Hero of the Soviet Union Dmitry Loza has carefully crafted his World War II experiences with U.S.-provided Sherman tanks into a highly readable memoir. Between the fall of 1943 and August 1945, Loza fought in the Ukraine, Romania, Hungary, Czechoslovakia, and Austria. He commanded a tank battalion during much of this period and had three Shermans shot out from under him. Loza's unit participated in such well-known combat actions as the Korsun-Shevchenkovskiy Operation, the Jassy-Kishenev Operation, and the battles for Budapest, Vienna, and Prague. Following the German surrender, Loza's unit was sent to Mongolia, where it participated in the arduous trek across the Gobi Desert to attack the Japanese Kwantung Army in Manchuria. This is the first available detailed examination of the Red Army's exploitation of U.S. war materiel during World War II and one of the first genuine memoirs available from the Russian front. Loza also provides firsthand testimony on tactical command decisions, group objectives and how they were accomplished, and Soviet use of combat equipment and intelligence. Only after the collapse of the USSR and concomitant relaxing of prohibitions against publication of materials related to the Lend-Lease Program there could this account be made available. Dmitriy Loza served as an instructor at the Frunze Academy after the war, retiring in 1967 with the rank of colonel. He resides in Moscow. James F. Gebhardt, now a defense contractor at Fort Leavenworth, is a Vietnam veteran. He is the author of Blood on the Shores: Soviet Naval Commandos in World War II.

The past 20 years has seen a remarkable growth in the knowledge base and skill set available in small animal practice the range of specialist information now available may appear daunting to the relatively inexperienced vet looking for a concise answer to one of the many common problems presented in the consulting room. Authored by vets with many years of experience in general practice, this new Foundation

Manual aims to provide the first port of call for the busy practitioner faced with uncertainty over a new case. Common sense, first line approaches are given in a problem oriented setting stemming from the nose to tail examination. The Manual is broadly divided into three sections: The Art of Canine Practice Common Consultations Common Clinical Presentations.

Simple, structured and effective, this 21-day course will prevent problem behaviour and, over subsequent days, encourage positive interaction, so that your dog continues to behave well. Exercises are given for each day in the training plan, with reinforcement of the previous day's learning scheduled in, as well as time for relaxation and play with your dog. The first section helps you to assess your key concerns so that you can tailor the programme to fit your needs, while a 'quick fix' section after the main training plan providing you with 50 speedy solutions to common problems, such as damaging furniture or unsociable behaviour towards strangers. Easy to fit in around your life, with this book you are just 21 training days away from the perfect dog.
