Pipeline transport is the long-distance transportation of a liquid or gas through a system of pipes—a pipeline—typically to a market area for consumption. The latest data from 2014 gives a total of slightly less than 2,175,000 miles (3,500,000 km) of pipeline in 120 countries of the world. The United States had 65%, Russia had 8%, and Canada had 3%, thus 75% of all pipeline were in these ...

Pipeline transport - Wikipedia

List of natural gas pipelines - Wikipedia

Utility E.ON will convert a natural gas pipeline in Germany that is part of the public supply system to carry 100% hydrogen to test whether gas pipelines are technically able to transport pure H₂. A technical standard in Germany currently limits the hydrogen concentration in natural gas networks to a maximum of 10%, but a number of trials have already explored higher admixture rates. E.ON said.
