~~That edition was subtitled "managing servers in the cloud," which reflects that most infrastructure automation until that point focused on configuring servers. Since then, containers and clusters have become a much bigger deal, and the infrastructure action has moved to managing collections of infrastructure resources provisioned from cloud platforms, what I (and many but not all other people) call stacks .~~

~~Infrastructure as Code~~

~~Infrastructure as code (IaC) is the process of managing and provisioning computer data centers through machine-readable definition files, rather than physical hardware configuration or interactive configuration tools. The IT infrastructure managed by this process comprises both physical equipment, such as bare-metal servers, as well as virtual machines, and associated configuration resources.~~
