James Gleick has offered his readership a scientifically sanitised but predominantly human biography of Sir Isaac Newton. Even when a reader actually works within the world of physical sciences, mathematics or analysis (as I do myself), I believe that sometimes we all wish to understand more about the private life of great, infamous or notable doers and thinkers.

James Gleick. Isaac Newton was born in a stone farmhouse in 1642, fatherless and unwanted by his mother. When he died in London in 1727 he was so renowned he was given a state funeral—an unheard-of honor for a subject whose achievements were in the realm of the intellect. During the years he was an irascible presence at Trinity College, Cambridge, Newton imagined properties of nature and gave them names— mass, gravity, velocity —things our science now takes for granted.
