Check out a preview. Edition after edition, Berger's highly praised, bestselling text opens students' eyes to the ways children grow/and the ways that growth is investigated and interpreted by developmentalists. Staying true to the hallmarks that have defined Berger's vision from the outset, the Eighth Edition again redefines excellence in a child development textbook, combining thoughtful interpretations of the latest science with new skill-building pedagogy and media tools that can revolutionize classroom and study time.

Each chapter includes a review of key concepts, guided study questions, and section reviews that encourage students' active participation in the learning process; two practice tests and a challenge test help them assess their mastery of the material. Applications and observational activities are also included.

Balanced coverage of the entire life span is just one thing that distinguishes HUMAN DEVELOPMENT: A LIFE-SPAN VIEW, Seventh Edition. With its comprehensive, succinct, and applied coverage, the text has proven its ability to capture students' interest while introducing them to the issues, forces, and outcomes that make us who we are. Robert V. Kail's expertise in childhood and adolescence, combined with John C. Cavanaugh's extensive research in gerontology, result in a book with a rich description of all life-span stages and important topics. A modified chronological approach traces development in sequential order from conception through late life, while also dedicating several chapters to key topical issues. This organization also allows the book to be relatively briefer than other texts, a benefit given the enormous amount of information covered in the course. The authors provide theoretical and empirical foundations that enable students to become educated, critical interpreters of developmental information. A blend of basic and applied research, as well as coverage of controversial topics and emergent trends, demonstrates connections between the laboratory and life.
