With MATLAB, you can: Create, modify, and analyze deep learning architectures using apps and visualization tools. Preprocess data and automate ground-truth labeling of image, video, and audio data using apps. Accelerate algorithms on NVIDIA® GPUs, cloud, and datacenter resources without specialized programming.

MATLAB for Deep Learning - MATLAB & Simulink

MATLAB® is used to teach programming because it has a simple programming environment. It has a low initial overhead which allows the novice programmer to begin programming immediately and allows the users to easily debug their programs. This is especially useful for people who have a “mental block” about computers.
