So regards to interpretation and prediction within supervised machine learning, the majority of our projects will actually call for a balance. So we walk through all those examples and

Where To Download Machine Learning And

within those examples we
thought of, I'd actually
want prediction when we were
talking about

interpretability, and from
interpretability, we'd
probably want a certain
level of prediction.

After exploring the concepts of interpretability, you will learn about simple, interpretable models such as decision trees, decision rules and linear regression.
