End of December I bought a new Bobcat 250 from Praxair for \$2844 + tax. It was only about \$130 more than the 225, has slightly better performance. What sold me was the enclosed engine. It's about 30% quieter than the 225 or the 250NT. Since I do a lot or my welding in residential settings, that was a deal-maker for me.

Following the 9/11 attacks by Al-Qa'ida, President Bush declared war on terror. In the succeeding years, Western governments have struggled to find the right way to respond to the new and deadly threat posed by terrorism. With the election of President Obama the rhetoric has softened and policies have been adjusted but the underlying problems and challenges remain the same. Meanwhile, the war on terrorism in Afghanistan has been intensified. Drawing on just war teaching as developed within both Christian and Muslim traditions, this book examines whether, and how, liberal democracies can combat the new global terrorism both effectively and justly. The authors, including distinguished academics from both sides of the Atlantic, Christian and Muslim theologians, former senior civil servants and a General, deploy a wide range of experience and expertise to address one of the most difficult and pressing ethical challenges to contemporary society.

She was a poor Southern tobacco farmer who worked the same land as her slave ancestors, yet her cells—taken without her knowledge—became one of the most important tools in medicine: The first “ immortal ” human cells grown in culture, which are still alive today, though she has been dead for more than sixty years. HeLa cells were vital for developing the polio vaccine; uncovered secrets of cancer, viruses, and the atom bomb ’ s effects; helped lead to important advances like in vitro fertilization, cloning, and gene mapping; and have been bought and sold by the billions. Yet Henrietta Lacks remains virtually unknown, buried in an unmarked grave. Henrietta ’ s family did not learn of her “ immortality ” until more than twenty years after her death, when scientists investigating HeLa began using her husband and children in research without informed consent. And though the cells had launched a multimillion-dollar industry that sells human biological materials, her family never saw any of the profits. As Rebecca Skloot so brilliantly shows, the story of the Lacks family—past and present—is inextricably connected to the dark history of experimentation on African Americans, the birth of bioethics, and the legal battles over whether we control the stuff we are made of. Over the decade it took to uncover this story, Rebecca became enmeshed in the lives of the Lacks family—especially Henrietta ’ s daughter Deborah. Deborah was consumed with questions: Had scientists cloned her mother? Had they killed her to harvest her cells? And if her mother was so important to medicine, why couldn ’ t her children afford health insurance? Intimate in feeling, astonishing in scope, and impossible to put down, *The Immortal Life of Henrietta Lacks* captures the beauty and drama of scientific discovery, as well as its human consequences.

A synthesis of research and theory, this work chronicles the dawn of a new era in which the adaptability and autonomy of living organisms becomes the model for human made systems and machines. The author combines ideas from the Chaos Theory, cybernetics, current thinking on evolution and research into computerized artificial life with his own experience of on-line culture to show that industrial culture is now obsolete. This book presents the prospects of imminent revolution as Kelly identifies new frontiers of thinking about biological systems that will change the way the natural world is perceived.

"In this magnificent book, Oliver Schuchard provides more than sixty-five exquisite black-and-white photographs spanning his thirty-eight years of photography. In addition, he explains the aesthetic rationale and techniques he used in order to produce these photographs, emphasizing the profound

differences between, yet necessary interdependence of, craft and content. Although Schuchard believes that craft is important, he maintains that the idea behind the photograph and the emotional content of the image are equally vital and are, in fact, functions of one another. The author also shares components of his life experience that he believes helped shape his development as an artist and a teacher. He chose the splendid photographs included in this book from among nearly 5,000 negatives that had been exposed all over the world, from Missouri to Maine, California, Alaska, Colorado, France, Newfoundland, and Hawaii, among many other locations. Approximately 250 negatives survived the initial review, and each of those was printed before a final decision was made on which photographs were to be featured in the book. The final choices are representative of Schuchard ' s work and serve to substantiate his belief that craft, concept, and self must be fully understood and carefully melded for a good photograph to occur. This amazing work by award-winning photographer Oliver Schuchard will be treasured by professional and amateur photographers alike, as well as by anyone who simply enjoys superb photography."--Publishers website.
