What is Broadband radar? The Navico Broadband radar uses FMCW (Frequency Modulated Continuous Wave) radar technology. FMCW radar is different: Firstly it is solid state – i.e. the transmitter is a semiconductor device, not based on magnetron technology. Secondly, it transmits a 1ms long signal of increasing frequency, rather than a

Broadband 3G™ Radar Installation Guide

Note: If a pulse radar and Broadband Radar are mounted on the same vessel, do not transmit simultaneously as excessive interference is possible. The Broadband Radar will not trigger X Band radar transponders, beacons, and I SARTs due to the low output power and signal properties.
