It is often implied that antipsychotic-induced extrapyramidal side-effects are irrelevant to modern psychiatric therapeutics, rendered historic by newer, better treatments. This myth arises from limited awareness of the depth and breadth of neurological disruption antipsychotics can mediate. This volume discusses the extensive clinical boundaries of acute dystonias, drug-induced parkinsonism, akathisia and tardive dyskinesia, providing demographic and epidemiological context while illustrating how prescribing choices impact powerfully on their development. This new edition has been thoroughly updated and rewritten to include recent data, expanded references and a new chapter on the concept of 'atypical' antipsychotics. Written in a light, engaging style, liberally illustrated with clinical examples, it also invites readers to consider ongoing controversies - subjective drug effects, the relationship between 'akathisia' and restless legs, the status of the concept of 'atypicality', and so on. Informative reading for trainees as well as established practitioners in the fields of psychiatry, neurology, primary care and geriatrics.

Pediatric incontinence: evaluation and clinical management offers urologists practical, 'how-to' clinical guidance to what is a very common problem affecting up to 15% of children aged 6 years old. Introductory chapters cover the neurophysiology, psychological and genetic aspects, as well as the urodynamics of incontinence, before it moves on to its core focus, namely the evaluation and management of the problem. All types of management methods will be covered, including behavioural, psychological, medical and surgical, thus providing the reader with a solution to every patient's specific problem. The outstanding editor team led by Professor Israel Franco, one of the world's leading gurus of pediatric urology, have recruited a truly stellar team of contributors each of whom have provided first-rate, high-quality contributions on their specific areas of expertise. Clear management algorithms for each form of treatment support the text, topics of controversy are covered openly, and the latest guidelines from the ICCS, AUA and EAU are included throughout. Perfect to refer to prior to seeing patients on the wards and in the clinics, this is the ideal guide to the topic and an essential purchase for all urologists, pediatric urologists and paediatricians managing children suffering from incontinence.

Volumes in Writing Spaces: Readings on Writing offer multiple perspectives on a wide-range of topics about writing, much like the model made famous by Wendy Bishop's "The Subject Is . . ." series. In each chapter, authors present their unique views, insights, and strategies for writing by addressing the undergraduate reader directly. Drawing on their own experiences, these teachers-as-writers invite students to join in the larger conversation about developing nearly every aspect of craft of writing. Consequently, each essay functions as a standalone text that can easily complement other selected readings in writing or writing-intensive courses across the disciplines at any level. Topics in Volume 1 of the series include academic writing, how to interpret writing assignments, motives for writing, rhetorical analysis, revision, invention, writing centers, argumentation, narrative, reflective writing, Wikipedia, patchwriting, collaboration, and genres.
