Which Hydraulic Oil □ What Hydraulic Oil Do I Need ...

A hydraulic fluid or hydraulic liquid is the medium by which power is transferred in hydraulic machinery. Common hydraulic fluids are based on mineral oil or water. Examples of equipment that might use hydraulic fluids are excavators and backhoes, hydraulic brakes, power steering systems, transmissions, garbage trucks, aircraft flight control systems, lifts, and industrial machinery. Hydraulic systems like the ones mentioned above will work most efficiently if the hydraulic fluid used has zero c

Guide to Hydraulic Oil - Lubricants for Industrial ...

Hydraulic oil can be misleading because although it may look clean, just like engine oil, it breaks down, loses its viscosity and its ability to hold contaminants in suspension, a process that helps protect all moving parts in the system. Hydraulic systems are designed to precise tolerances and most hydraulic failures can be traced back to contaminated hydraulic oil or even the wrong hydraulic oil.

Oil Coolers in Hydraulic Systems: Types And Benefits

I'm changing oil in my hydraulic system and I'm undecided if I should use Mobil1 10w-40 High Mileage or 15w-50. Both are full synthetic. Would the seal conditioners in the high mileage oil be good for the hydraulic pump or will the additional additives be more likely to break down sooner than the 15w50.
