With a new Introduction to this touching homage to his mother, the author paints a portrait of growing up in a black neighborhood as the child of an interracial marriage. Although raised an Orthodox Jew in the South, McBride's mother abandoned her heritage, moved to Harlem, and married a black man.

Esmeralda Santiago's story begins in rural Puerto Rico, where her childhood was full of both tenderness and domestic strife, tropical sounds and sights as well as poverty. Growing up, she learned the proper way to eat a guava, the sound of tree frogs in the mango groves at night, the taste of the delectable sausage called morcilla, and the formula for ushering a dead baby's soul to heaven. As she enters school we see the clash, both hilarious and fierce, of Puerto Rican and Yankee culture. When her mother, Mami, a force of nature, takes off to New York with her seven, soon to be eleven children, Esmeralda, the oldest, must learn new rules, a new language, and eventually take on a new identity. In this first volume of her much-praised, bestselling trilogy, Santiago brilliantly recreates the idyllic landscape and tumultuous family life of her earliest years and her tremendous journey from the barrio to Brooklyn, from translating for her mother at the welfare office to high honors

at Harvard.

“For sheer adventure L’Amour is in top form.”—Kirkus Reviews Here is the kind of authentically detailed epic novel that has become Louis L’Amour’s hallmark. It is the compelling story of U.S. Air Force Major Joe Mack, a man born out of time. When his experimental aircraft is forced down in Russia and he escapes a Soviet prison camp, he must call upon the ancient skills of his Indian forebears to survive the vast Siberian wilderness. Only one route lies open to Mack: the path of his ancestors, overland to the Bering Strait and across the sea to America. But in pursuit is a legendary tracker, the Yakut native Alekhin, who knows every square foot of the icy frontier—and who knows that to trap his quarry he must think like a Sioux. Louis L’Amour’s Lost Treasures is a project created to release some of the author’s more unconventional manuscripts from the family archives. In Louis L’Amour’s Lost Treasures: Volumes 1, Beau L’Amour takes the reader on a guided tour through many of the finished and unfinished short stories, novels, and treatments that his father was never able to publish during his lifetime. L’Amour’s never-before-seen first novel, No Traveller Returns, faithfully completed for this program, is a voyage into danger and violence on the high seas. These exciting publications will be followed by Louis L’Amour’s Lost Treasures: Volume 2.

Additionally, many beloved classics will be rereleased with an exclusive Lost Treasures postscript featuring previously unpublished material, including outlines, plot notes, and alternate drafts. These postscripts tell the story behind the stories that millions of readers have come to know and cherish.

Garden Alchemy is a hands-on guide for do-it-yourself gardeners who want to turn their garden into gold using natural recipes and herbal concoctions (while saving both time and money!). This gardening recipe and project book is packed with over 80 ideas to naturally beautify your garden, using organic methods that regenerate your soil and revitalize your plants. By following the processes that are closest to nature, it brings the gardener in sync with the garden, allowing plants to thrive with less effort and less cost. Recipes for mixing your own potting soils and homemade organic fertilizers give you the freedom to choose what ingredients make their way into your garden. Step-by-step instructions for building a compost pile, concocting soil tests, and constructing inexpensive DIY seed-starting equipment are accompanied by gorgeous, full-color, step-by-step photography. You'll also find recipes for natural pest deterrents and traps, garden teas, and growth-boosting foliar sprays to help your garden grow strong all season long. Garden Alchemy starts with home experiments to help you get to know your

soil and customize recipes for your individual needs. The rest of the chapters share how to decipher and combine natural ingredients to make the best quality amendments and elixirs. Detailed descriptions of earth-based materials demystify common ingredients, such as mycorrhizae, biochar, and greensand, and help you learn how to fix common garden problems with minimal effort. The simple method of making use of what you have available supports plants better than brand-name products. Dozens of recipes and projects include: Homemade seed bombs, disks, and tapes Granular and liquid natural fertilizer recipes DIY rooting hormone Herbal anti-fungal spray Plant propagation instructions Soil care recipes to adjust the pH and manage fertility 13 specialty potting mixes 7 clever traps for common garden pests Written by Stephanie Rose, the creative gardener, permaculturist, and herbalist behind the popular website Garden Therapy, this fun and beautifully illustrated book is packed with great ideas and inspiration for DIY gardeners who want to embrace their creativity and have more control of the garden's care.

full-color workbook contains appropriate passages and exercises based on national standards for sixth through eighth grade to help ensure that children master algebra math skills before progressing. Skill Builders combines entertaining and interactive activities with eye-catching graphics to make learning and reviewing fun and effective. The compact 6" x 9" size makes this book perfect for school, at home, or on the go. It features 80 perforated, reproducible pages and an answer key.

NOW A MAJOR MOTION PICTURE #1 NEW YORK TIMES BESTSELLER A thrilling tale of betrayal and revenge set against the nineteenth-century American frontier, the astonishing story of real-life trapper and frontiersman Hugh Glass The year is 1823, and the trappers of the Rocky Mountain Fur Company live a brutal frontier life. Hugh Glass is among the company's finest men, an experienced frontiersman and an expert tracker. But when a scouting mission puts him face-to-face with a grizzly bear, he is viciously mauled and not expected to survive. Two company men are dispatched to stay behind and tend to Glass before he dies. When the men abandon him instead, Glass is driven to survive by one desire: revenge. With shocking grit and determination, Glass sets out, crawling at first, across hundreds of miles of uncharted American frontier. Based on a true story, The Revenant is a remarkable tale of obsession,

the human will stretched to its limits, and the lengths that one man will go to for retribution.

A selchie, a seal transformed into human form, lives on land with a lonely fisherman and his wife, until the day a great storm threatens the fisherman's life.

Design and Manufacture of Plastic Components for Multifunctionality: Structural Composites, Injection Molding, and 3D Printing presents the latest information on how plastics manufacturers are increasingly being driven towards carbon emission reduction, lightweighting, and cost savings through process integration. These technologies have the potential to revolutionize future products with built-in functionality such as sensors, smart packaging, and damage detection technology for everything from milk bottles and salad packaging to automotive bumpers and plane fuselages. This book introduces the three core manufacturing methods for multifunctional materials, composites, injection molding, and 3D printing, all processes facing challenges for the implementation of new technology. Users will find a book that brings together both process and material advances in this area, giving process engineers, designers, and manufacturers the information they need to choose the appropriate material and process

for the product they are developing. Provides an introduction to the latest technologies in the area of multifunctionality, enabling engineers to implement new breakthroughs in their own businesses Gives an understanding of the processes that need to be considered in both design and manufacture of future devices, while using materials from a broader palette than used in existing manufacturing processes Includes best practice guidance and flow charts to aid in material and process selection Covers revolutionary future products with built-in functionality such as sensors, smart packaging, and damage detection technology for everything from milk bottles and salad packaging to automotive bumpers and plane fuselages

In this book, the term "electrochemical nanotechnology" is defined as nanoprocessing by means of electrochemical techniques. This introductory book reviews the application of electrochemical nanotechnologies with the aim of understanding their wider applicability in evolving nanoindustries. These advances have impacted microelectronics, sensors, materials science, and corrosion science, generating new fields of research that promote interaction between biology, medicine, and microelectronics. This volume reviews nanotechnology applications in selected high technology areas with particular emphasis on advances in such areas. Chapters are classified under four different headings:

Nanotechnology for energy devices -
Nanotechnology for magnetic storage devices -
Nanotechnology for bio-chip applications -
Nanotechnology for MEMS/Packaging.

A new window to local studies of interface phenomena at solid state surfaces has been opened by the development of local probe techniques such as Scanning Tunneling Microscopy (STM) or Atomic Force Microscopy (AFM) and related methods during the past fifteen years. The in-situ application of local probe methods in different systems belongs to modern nanotechnology and has two aspects: an analytical aspect and a preparative aspect. The first aspect covers the application of the local probe methods to characterize thermodynamic, structural and dynamic properties of solid state surfaces and interfaces and to investigate local surface reactions. Two methods which are still in the beginning of their development represent the second aspect: tip and cantilever. They can be used to form defined nano-objects such as molecular or atomic clusters, quantum dots etc. as well as to structure or modify solid state surfaces in the nanometer range. This IUPAC monograph is a comprehensive treatment of both aspects and presents the current state of knowledge. It is written for scientists active in the area of nanotechnology.
