Multiply and divide decimals by 10, 100 and 1000 ...

Dividing by 10 or 100. Now we've had a good look at place value here and here, we can go on to explore what happens when you divide or multiply by 10 or 100. Place value is all about 10s. Take the number 57. If we multiply by 10, it becomes 570. Now we know that moving from Units to Tens to Hundreds means we multiply by 10 each time.

Place Value: Multiplying and dividing by ten and the ...

If we have 212 10s, divided by 10, we wanna move this 10s one place value to the right, or smaller, which is ones. So our solution would be 212 ones. Which is equal to what we already saw, simply 212. So 212 10s, divided by 10. We could write the number out and drop a zero, or we could think about place value and move one place value to the right.

Place value when multiplying and dividing by 10 (video ...

Use place value, known and derived facts to multiply and divide mentally, including: multiplying by 0 and 1; dividing by 1; multiplying together three numbers
