Protein Synthesis Lab-- A paper-scissor-tape activity used to help students envision the process of protein synthesis -- transcription, post-transcriptional processing, translation, and the effect of mutations. Replication Activity-- although we end up with a poster, the goal of this activity is to re-enact replication. The group of students (I usually do groups of 4 since there is a lot of cutting) must act out replication for the teacher using these "players" and only in the end do they ...
