Scattante, for instance, is the house brand" for the Performance bike shops. The frames are made, for the most part, in Taiwan, at factories that have plenty of experience and, in fact, probably ...

Are these new high-end, affordable road bikes too good to ...
The Scattante brand back in 2009 used uniuoque carbon fiber, which is very sturdy and light. They are not as stiff as an aluminum frame which makes for a smoother ride on rough surfaces by comparison. The lack of stiffness might be a problem for heavier guys on hills, but lets face it, carbon is carbon.

Is the Scattante brand good? I know it's the house brand ...
After searching for months for a carbon road bike, I chose the Scattante Race based on value and quality. I'm 6'2" so the 61cm frame fit me best. It rides like a dream. I've had it up to 42mph with no shutter. The bike is a 2008 model. (2008 was not an option on the "year" section above.)

HUGE difference between a \$200 Walmart road bike (one of those "GMC Denali" things) vs. a real road bike. A real road bike has combined brake/shift levers like Shimano's STI setup so you ride the bike with your hands on the lever hoods like 90% of the time where you have a neutral hand position and the best steering control, versus the "GMC Denali" which uses those awkward grip-twist ...

Yeah yeah that's it, \$3,500 for a f'ing bike is a good deal! There's motivation and then there's riding a bike that's worth more than your car (in my case a 14yr old 1999 Ford Windstar). Then I landed at Performance Bikes taking a Scattante CFR SE out for a spin.

Why do people race in Ironmans—a competition that was dreamed up by a U.S. Navy Officer after a beer-influenced debate over who were the fittest athletes—swimmers, cyclists, or runners? Only a person whose good sense was severely impaired would decide to do a race marked by such agony and suffering—a race that makes no sense to normal people. What type of person (lunatic) goes to bed at 9:00 p.m. and wakes up at 4:00 a.m. every day for twelve months, eliminates every fun thing to eat and drink, incurs thousands of death stares from an angry spouse, and spends a minimum of ten thousand dollars...all to put their body through a seventeen-hour torture chamber during which a potpourri of exciting, physiological wonders—such as dehydration, fuel supply shortages, oxidative stress, muscle damage, brain fatigue, and overheating—occur, causing the body to age by twenty years? Russell Newell would find out when he signed up for the second oldest Ironman in the country: Lake Placid, in the idyllic Upstate New York village nestled in the Adirondacks that twice hosted the Winter Olympics. Russell would then question his sanity and test his resolve as he attempted to finish the 2018 Ironman Lake Placid...despite almost drowning, crashing on his bike, and nearly shitting his pants eighteen times.

Plump, grumpy, slumped on the couch, and going nowhere fast at age 16, Phil Gaimon began riding a bicycle with the grand ambition of shedding a few pounds before going off to college. He soon fell into racing and discovered he was a natural, riding his way into a pro contract after just one season despite utter ignorance of a century of cycling etiquette. Now, in his book Pro Cycling on \$10 a Day, Phil brings the full powers of his wit to tell his story. Presented here as a guide—and a warning—to aspiring racers who dream of joining the professional racing circus, Phil's adventures in road rash serve as a hilarious and cautionary tale of frustrating team directors and broken promises. Phil's education in the ways of the peloton, his discouraging negotiations for a better contract, his endless miles crisscrossing America in pursuit of race wins, and his conviction that somewhere just around the corner lies the ticket to the big time fuel this tale of hope and ambition from one of cycling's best story-tellers. Pro Cycling on \$10 a Day chronicles the racer's daily lot of blood-soaked bandages, sleazy motels, cheap food, and overflowing toilets. But it also celebrates the true beauty of the sport and the worth of the journey, proving in the end that even among the narrow ranks of world-class professional cycling, there will always be room for a hard-working outsider.

Cycling is explodingin a good way. Urbanites everywhere, from ironic hipsters to earth-conscious commuters, are taking to the bike like aquatic mammals to water. BikeSnobNYC—cycling's most prolific, well-known, hilarious, and anonymous blogger—brings a fresh and humorous perspective to the most important vehicle to hit personal transportation since the horse. Bike Snob treats readers to a laugh-out-loud rant and rave about the world of bikes and their riders, and offers a unique look at the ins and outs of cycling, from its history and hallmarks to its wide range of bizarre practitioners. Throughout, the author lampoons the missteps, pretensions, and absurdities of bike culture while maintaining a contagious enthusiasm for cycling itself. Bike Snob is an essential volume for anyone who knows, is, or wants to become a cyclist.

How can the social sciences help us to understand the past, present and potential futures of cycling? This timely international and interdisciplinary collection addresses this question, discussing shifts in cycling practices and attitudes, and opening up important critical spaces for thinking about the prospects for cycling. The book brings together, for the first time, analyses of cycling from a wide range of disciplinary backgrounds, including history, sociology, geography, planning, engineering and technology. The book redresses the past neglect of cycling as a topic for sustained analysis by treating it as a varied and complex practice which matters greatly to contemporary social, cultural and political theory and action. Cycling and Society demonstrates the incredible diversity of contemporary cycling, both within and across cultures. With cycling increasingly promoted as a solution to numerous social problems across a wide range of policy areas in car-dominated societies, this book helps to open up a new field of cycling studies.

For decades the crown jewels of Japan's postwar manufacturing industry, motorcycles remain one of Japan's top exports. Japan's Motorcycle Wars assesses the historical development and societal impact of the motorcycle industry, from the influence of motor sports on vehicle sales in the early 1900s to the postwar developments that led to the massive wave of motorization sweeping the Asia-Pacific region today. Jeffrey Alexander brings a wealth of information to light, providing English translations of transcripts, industry publications, and company histories that have until now been available only in Japanese. By exploring the industry as a whole, he reveals that Japan's motorcycle industry was characterized not by communitarian success but by misplaced loyalties, technical disasters, and brutal competition.
