The second edition of this sourcebook brings together a comprehensive selection of the principal international, European and domestic sources of environmental law, together with commentary and extensive references to secondary sources (including relevant websites). The new edition has been fully revised and extended to include the major developments in this rapidly evolving area of law. In particular, at the international level there is now consideration of the Kyoto Protocol 1997, the Aarhus Convention 1998, the Basel Protocol 1999 and the Biosafety Protocol 2000. At the European level, there is coverage of the changes introduced by the Amsterdam Treaty; the 2000 Water Framework Directive; the new Air Quality Directives; and the EC White Paper on Environmental Liability. There is also discussion of the proposed Sixth Environmental Action Programme. The domestic coverage includes consideration of the Pollution Prevention and Control Act 1999, the Countryside and Rights of Way Act 2000, the implementation of the contaminated land regime, together with coverage of the new UK waste strategy. The book now also includes extensive consideration of the impact of the Human Rights Act 1998 on environmental law. Recent case law is included throughout. This unique work will provide an extremely valuable resource for all those studying, teaching and working in the field of environmental law.

"Environmental Crime: A Sourcebook provides ideas, tools, and data to investigate environmental offenses. Burns and Lynch urge readers to recognize the availability of a wide array of data regarding environmental offenses and provide bibliographic tools to locate this data. They also provide data sets and examples of data available from the Environmental Protection Agency (EPA) and state agencies charged with enforcing environmental laws. Specific sections describe EPA resources, accessing and downloading EPA and other environmental law compliance and violation data, methods of compiling EPA data, actual environmental crime data sets, and research that can be performed using these data. Written in a non-technical manner, the book is designed to provide readers from all backgrounds with an understanding of environmental crime and the avenues by which it can be recognized and researched."--BOOK JACKET. The International Humanitarian Law (Law of Armed Conflict) Sourcebook is a comprehensive compilation of the major source documents of International Humanitarian Law. Whether alone as a reference on the laws of armed conflict, or combined into a set as a companion volume with The International Human Rights Law Sourcebook to complete a picture of complementary bodies of international law, this ready-reference will be invaluable to lawyers, policymakers, military leaders, nongovernmental

organizations and academics around the world.

World Bank Technical Paper No. 139. Also available: Volume 2 (ISBN 0-8213-1844-6) Stock No. 11844; Volume 3 (ISBN 0-8213-1845-4) Stock No. 11845. Provides state-of-the-art guidance and information on the procedural requirements and practical aspects of environmental assessment in various sector- and location-specific contexts. Three volumes also available in Arabic: Volume 1 (ISBN 0-8213-3523-5) Stock No. 13523; Volume 2 (ISBN 0-8213-3617-7) Stock No. 13617; Volume 3 (ISBN 0-8213-3618-5) Stock No. 13618.

With radical and innovative design solutions, everyone could be living in buildings and settlements that are more like gardens than cargo containers, and that purify air and water, generate energy, treat sewage and produce food - at lower cost. Birkeland introduces systems design thinking that cuts across academic and professional boundaries and the divide between social and physical sciences to move towards a transdisciplinary approach to environmental and social problem-solving. This sourcebook is useful for teaching, as each topic within the field of environmental management and social change has pairs of short readings providing diverse perspectives to compare, contrast and debate. Design for Sustainability presents examples of integrated systems design based on ecological principles and concepts and drawn from the foremost designers in the fields of industrial design, materials, housing design, urban planning and transport, landscape and permaculture, and energy and resource management.

The theoretical arguments for environmental taxes and other types of economic instruments for environmental protection have been discussed extensively in the literature. Rather less well discussed has been the extremely complex form that such instruments have in fact taken in practice. Environmental Taxation Law: Policy, Contexts and Practice examines the legal implications of introducing environmental taxes and other economic instruments into the regulatory framework of UK law. In doing so, it analyzes and explains the difficulties of grafting environmental taxes onto the complexities of existing regulatory structures, not all of which, of course, were originally devised with environmental considerations in mind. Although the focus of the book is the UK's pioneering implementation of a web of distinct yet interrelated policy measures, it locates the UK's taxes and instruments not simply in their broader context of market and environmental regulation, but also in the contexts of European and international law.

Although it is commonly asserted that enhanced citizen participation results in better environmental policy and improved enforcement of environmental standards, this hypothesis has rarely been subject to testing on a comparative basis. The contributors to this book set out to study the extent to which citizens can and do exert influence over their urban environments through the legal (and extra-legal) 'gateways' in eleven countries spanning several continents as well as different climates, levels and type of economic development, and national legal and constitutional systems, as well as exhibiting a different set of environmental problems. One interviewee questioned about access to environmental justice, dryly remarked that in his city there was no environment, no justice and no access to either. Yet this view, as will be seen, requires to be nuanced. While few people will be surprised by the finding that legal gateways to environmental justice are largely ineffective, the reasons for this are revealing; but also the richness of detail and the comparisons between the different countries, and also the positive aspects which surfaced in several instances, were indeed both encouraging and sometimes surprising. This book presents the first comparative survey of access to environmental justice, and will be of considerable use to lawyers, policy-makers, activists and scholars who are concerned with the environmental issues which so profoundly affect and afflict our habitat and conditions of social justice throughout the world.

World Bank Technical Paper No. 140. Also available: Volume 1 (ISBN 0-8213-1843-8) Stock No. 11843; Volume 3 (ISBN 0-8213-1845-4) Stock No. 11845. Provides state-of-the-art guidance and information on the procedural requirements and practical aspects of environmental assessment in various sector- and location-specific contexts. Three volumes also available in Arabic: Volume 1 (ISBN 0-8213-3523-5) Stock No. 13523; Volume 2 (ISBN 0-8213-3617-7) Stock No. 13617; Volume 3 (ISBN 0-8213-3618-5) Stock No. 13618.

Offering a detailed account of the various legal arrangements at European Union level, this book is an ideal reference tool for practitioners and legal scholars. As well as examining the principal sources of EU environmental law enforcement, it also contributes to the legal and political debates that surround the subject. Spanning three parts, the author examines the practical impact of the legal arrangements at Union level that are used to uphold EU environmental norms. Offering a comprehensive account of the current state of EU environmental law enforcement and the developments affecting it, Martin Hedemann-Robinson explores the role of the European Commission, the possibilities for private law enforcement, and the responsibilities of member state national authorities. Key legal developments that have occurred since the first edition have been incorporated, including new statutory developments and case law. Particular attention is paid to the impact of the 2007 Lisbon Treaty on foundational EU treaty provisions enabling the European Commission to take legal action against EU member states infringing Union environmental law, the establishment of a new legal architecture at Union level on the topic of environmental criminal policy, as well as increased EU legislative intervention in the area of environmental inspections. The impact of the 1998 Århus Convention on EU environmental law enforcement is also addressed in detail, including the influence of recommendations of the Århus Convention's Compliance Committee.
