Test Bank for Systems Analysis and Design, 9th Edition: Shelly

The systems development life cycle consists of five phases: systems planning, systems analysis, systems design, systems implementation, and systems operation and support. During the systems planning phase, you identify the nature and scope of the problems discovered in the systems request and conduct a preliminary investigation.

**(DOC) Solution-Manual-for-Systems-Analysis-
and-Design-9th ...**

System analysis is conducted for the purpose of studying a system or its parts in order to identify its objectives. It is a problem solving technique that improves the system and ensures that all the components of the system work efficiently to accomplish their purpose. Analysis specifies what the system should do.
