The digital age is particularly challenging for organisations. Many leaders seem to think that it is simply a case of adding the latest tech to their old industrial era model. Hence we often hear the term, the 4th industrial revolution (4IR). Hyper-uncertainty and increased volatility require a fundamental rethink of business models.

What is the digital age? - Ade McCormack
The Information Age is a historical period that began in the mid-20th century, characterized by a rapid epochal shift from the traditional industry established by the Industrial Revolution to an economy primarily based upon information technology. The onset of the Information

Age can be associated with the development of transistor technology, particularly the MOSFET, which became the fundamental building block of digital electronics and revolutionized modern technology. According to the United

Information Age - Wikipedia

Despite recent rapid increases, there are still 4.8 million people over the age of 55 who are not online, making up 91% of the population who are not online (5.3 million people). (ONS, 2018) These people – who are already likely to be poorer, less well educated and in worse health than their peers – are at risk of being left on the wrong side of the digital divide, as more services and information move online.
