Welcome to Foragelab

The number of official laboratories for food and feed has been declining and this has increased concerns about the resilience of UK official food and feed laboratory service capacity and capability. While this situation has been the subject to a number of reviews over time, a formal assessment of the entire laboratory network has never been conducted by government.

Laboratory analyses of feeds provide the best indication of nutrient availability, allowing feeds to be utilized to their full potential. Reliable nutritional information is important not only balance rations, but also allows ration balancing programs to determine the most economical ration that will meet the animals' requirements.
