Women's Secrets provides the first modern translation of the notorious treatise *De secretis mulierum*, popular throughout the late middle ages and into modern times. The Secrets deals with human reproduction and was written to instruct celibate medieval monks on the facts of life and some of the ways of the universe. However, the book had a much more far-reaching influence.

Women's Secrets provides the first modern translation of the notorious treatise *De secretis mulierum*, popular throughout the late middle ages and into modern times. The Secrets deals with human reproduction and was written to instruct celibate medieval monks on the facts of life and some of the ways of the universe. However, the book had a much more far-reaching influence. Lemay shows how its message that women were evil, lascivious creatures built on the misogyny of the work's Aristotelian sources and laid the groundwork for serious persecution of women. Both the content of the treatise and the reputation of its author (erroneously believed to be Albertus Magnus) inspired a few medieval scholars to compose lengthy commentaries on the text, substantial selections from which are included, providing further evidence of how medieval men interpreted science and viewed the female body.

Drawing upon 'global governance,' 'global civil society' (GCS) and 'international lawmaking' scholarship and presenting studies of GCS practice in international lawmaking processes, including treaty-making, conferences, international organisations and adjudicatory mechanisms, this book comprehensively re-evaluates GCS's role in public international lawmaking.

This book provides the most detailed and comprehensive examination to date of the impact of environmentalism upon contemporary political thought. It sets out to disentangle the various strands of Green political thought and explain their relationship to the major Western political traditions. Environmentalism and Political Theory represents the consolidation of a new field of political inquiry that is destined to become an increasingly important component of political studies and political reporting worldwide. An interdisciplinary study that builds bridges between environmental philosophy, ecological thought, and political inquiry, this book employs a range of new insights from environmental philosophy to outline a particular Green political perspective.

As a botanist, Robin Wall Kimmerer has been trained to ask questions of nature with the tools of science. As a member of the Citizen Potawatomi Nation, she embraces the notion that plants and animals are our oldest teachers. In *Braiding Sweetgrass*, Kimmerer brings these two lenses of knowledge together to take us on "a journey that is every bit as mythic as it is scientific, as sacred as it is historical, as clever as it is wise" (Elizabeth Gilbert). Drawing on her life as an indigenous scientist, and as a woman, Kimmerer shows how other living beings—asters and goldenrod, strawberries and squash, salamanders, algae, and sweetgrass—offer us gifts and lessons, even if we've forgotten how to hear their voices. In reflections that range from the creation of Turtle Island to the forces that threaten its flourishing today, she circles toward a central argument: that the awakening of ecological consciousness requires the acknowledgment and celebration of our reciprocal relationship with the rest of the living world. For only when we can hear the languages of other beings will we be capable of understanding the generosity of the earth, and learn to give our own gifts in return.

In what might seem an unusual pairing, Barlett brings together the insights of Albert Camus and feminist thought, and in doing so sheds new light on both. Looking through a Camusian lens, Bartlett reveals a 'rebellious feminism' that simultaneously refuses oppression and affirms human dignity in solidarity with concrete, diverse others and the earth, giving us new insights into this life-affirming ethic.

A translation of Grazia Deledda's final novel, an autobiographically based portrayal of an Italian woman coming to terms with breast cancer at the cusp of the twentieth century.
